## **PROJECT:**

### **\*Automated gate system works with solar energy**

## **Project description:**

The modern society is increasingly witnessing the gated communities for living. Due to increase in number of gated communities need for relevant amenities including safety and access is the primary requirement. Since these gated communities required man power and other resources, operation of the same is a burden on these community in the form of maintenance charges. The major aspect of gated community is access to the vehicles preferably cost owned by the residents. Due to amenity, Ambient available latest and emerging technologies ARDUINO sensors and other gadgets design a safe and secure system in a affordable cost. ARDUINO is made primarily of ATMEGA8 and ATMEGA168 controllers, and all its designs are licensed under the Creative Commons license.
